## What is claimed is:

- 1. A method for correlating a subscriber unit to a physical port in a point to multipoint wire line network comprising:
- (a) prompting an installer to manually input a location code associated with the subscriber;
  - (b) receiving the location code in the subscriber unit;
  - (c) transmitting the location code via the network to a central repository; and
- (d) storing the location code in the central repository toward associating the location code with the physical port.
  - 2. The method of Claim 1 further comprising:
  - (d1) checking the location code for errors before storing;
- (d2) upon finding an error, transmitting an instruction to the subscriber unit to indicate error to the installer; and
  - (d3) upon finding no errors, storing the location code.
- 3. The method of Claim 2 further comprising prompting the installer to reinput the location code.
  - 4. The method of Claim 1 further comprising:
  - (c1) transmitting the site code; and
  - (d1) storing the site code in the central repository.
